

Building Intelligence

Get connected.

Building Intelligence connects your building's systems to assess data connectivity, network integrity and overall readiness for your smart building program. The Switch IoT gateway connects to, and integrates with, existing systems such as building management systems (BMS), HVAC, lighting, metering, cameras and access control.

Switch IoT Gateway

What do you get?

An IoT gateway with Switch's smart building software, selected to suit the specific size and type of building.

Benefit

Connect and feed data points to the Switch Platform to help you fully understand your connectivity status.

Integration Support

What do you get?

Up to 8 hours of remote support from integration specialists to ensure full connectivity.

Benefit

Bridge the gap between IT and building management teams with expert support and seamlessly integrate disparate building systems.

Data Commissioning Report

What do you get?

An interactive report that provides insights into all compatible systems and their data points on the building network.

Benefit

Gain a better understanding of building data and the necessary steps to prepare for and the potential value from a smart building program.

Leverage a proven solution

There's network integration, and then there's Switch Building Intelligence. Here are a few things that set us apart:

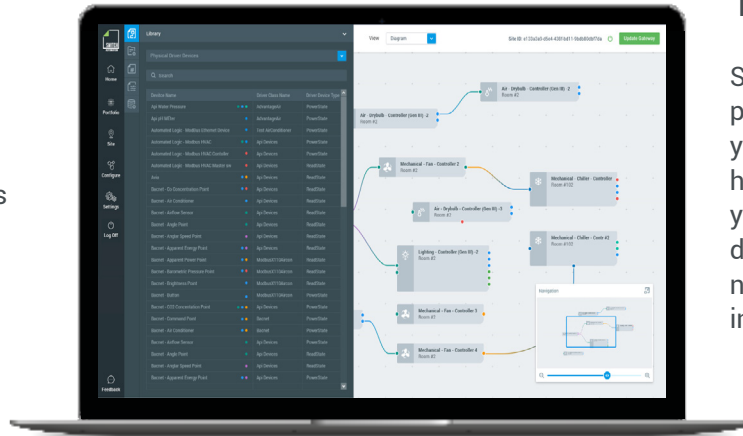

Secure

Hosted on Microsoft Azure, the Switch Platform passes advanced data security tests for top-tier technology and banking companies.

Tailored

Switch's data commissioning provides in-depth insight into your sites' connectivity. From here, we can help you create your unique IoT strategy, right down to recommending which new type of sensor you should install next.

Complete

Building Intelligence is a foundational site-readiness tool to prepare for subsequent deployments of smart building software, including retrocommissioning, continuous commissioning and control.

Supported

Our team and ecosystem of partners are here to support your integration process, answer questions and help you make the most of Switch Building Intelligence.

"We were able to bring data from a wide variety of sources together onto one network and leveraged this to evaluate the connectivity of over 7,000 sensors across our entire building portfolio. Not only did we validate our functional sensors, but we were able to identify disconnected and miscalibrated devices and the root causes."

- Portfolio Energy Manager, Commercial Real Estate, Chicago

Get results right away

As easy as 1, 2, 3. Here are the steps to implementing Switch Building Intelligence:

1 Strategy Development & Project Kick Off

The Switch Team works with you to set project goals and objectives, quantify immediate and long-term benefits and determine which data sources to integrate.

3 Data Commissioning Report & Next Steps

Switch provides automated analytics to detail all connected devices and identify any issues with network performance and sensor readings. You'll receive an interactive Data Commissioning Report, detailing which sensors are connected correctly and which are returning unusual results, gaining actionable insights to improve your connectivity.

2 Installation, Integration & Confirmation

Switch will dispatch your gateway(s), advise on IoT sensor strategy and provide network integration support.

Pricing

Simple and transparent fixed pricing, based on building square footage:

<p>SMALL BUILDINGS</p>  <p>\$9,000</p> <p>Less than 100,000 sq ft</p> <p>LEARN MORE</p>	<p>LARGE BUILDINGS</p>  <p>\$13,500</p> <p>More than 100,000 sq ft</p> <p>LEARN MORE</p>

About Switch

Switch Automation is globally recognized as a leader in customer-centric smart building program development. We'll help you figure out where to start with smart building technology and develop a strategy that fits and grows with your organization. We're experts at quickly identifying improvement opportunities that will lead to significant return on investment for enterprise real estate portfolios.
